# CWF 5001

HAND DRAWN CURTAIN TRACK SYSTEM

CWF 5001 profile is a strong, functional and fully reversible profile that offers a comprehensive range of accessories to suit all mounting possibilities.

The CWF 5001 (6 mm) cubicle curtain track was developed for technical curtain solutions in hospitals and health care facilities. Whether for light weight or heavy weight curtain solutions the cubicle track has a wide variety of flexible options.

The 5001 is popular as roomdivider, for ceiling curtains and for bathrooms as well. Works perfectly with our new 6035 wave

Black

## BENDING OPTIONS

\*If the curtain track is made with bends, the maximum weight limit will be halved.

## 5001 WITH ANTILIGATURE SAFE TRACK

The 5001 Antiligature is a Safe Track is developed especially for use in Hospitals.

The purpose of using the 5001 Antiligature SafeTrack is to avoid that patients uses curtain tracks or bed dividers, for suicide purposes by hanging themselves.

Standard installation of curtain track 5001, will be done with mounting parts, that are strong enough to carry the weight of a person.

The 5001 SafeTrack are to be installed with the special developed suspensions, V-hangers, ceiling and wall brackets.

As for standard installations with either ceiling brackets or a combination of suspensions and V-hangers, the 5001 Safe Track, will release the curtain track by a weight of 17kg +/- 5kg

As for installations only with V-hangers and wall brackets, the system will release the track by a weight of 29 kg +/- 5kg.

At CWF safety is a top priority and we find it crucial, that our products can be used safely in any environment. As suppliers, dealers and installers, we must do everything we can to avoid accidents.

CWF's products comply with European standard EN 13120, which came into effect in 2014, and which states, that window treatments, installed in places where children between the ages of 0 and 42 months might be present, must be equipped with anti-ligature accessories and installed in accordance with the prescribed rules.

We are constantly working to develop new products which can help minimize the risk of accidents, and already have several patented products in our portfolio.

Our cubicle track systems can both be used in hospital wards as well as serve as shower rails. They offer total flexibility with fitting to the wall, ceiling, or both, and can be bent and made to measure to fulfill any requirements.

Works both with light and heavy curtains and has efficient and quiet operation.

CWF Safetrack Ant ligature is our range of anti ligature accessories, which has been developed for use in public, private, and psychiatric hospitals.

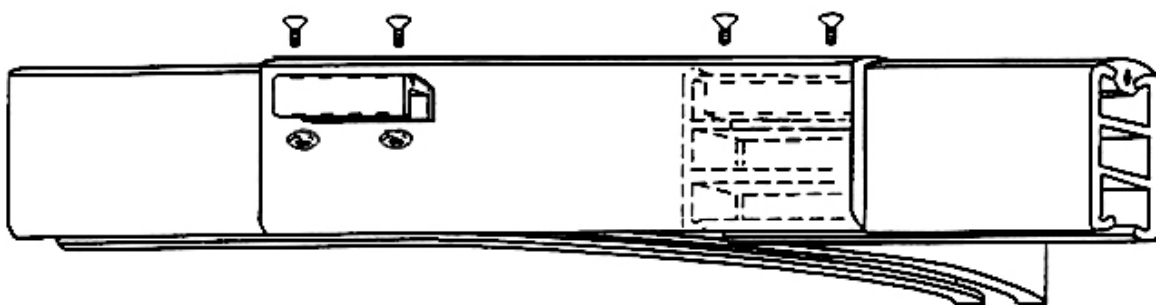

To avoid any self harm or in extreme cases, loss of life, Safetrack is designed to release from fixation points (brackets & suspensions) by an average pull of approx. 20 kilo. Safetrack is recommended for all kinds of installations with ceiling suspensions and wall brackets.

CWF Safetrack has been tested and certified by the Danish Technological Institute and follows the international anti ligature regulations.
