NEW

CWF DECO 1020

ELECTRIC, BATTERY AND HAND DRAWN CURTAIN TRACK SYSTEM

Introducing our Deco 1020 a perfect addition to elevate the aesthetic appeal of your space. Specifically designed to seamlessly integrate with our CWF 1020 curtain track, creating a modern and sophisticated ambiance.

The Deco 1020 is available in both battery-powered and electric options, offering convenience and flexibility in operation. Its robust design is complemented by a stylish ball finial, adding a touch of elegance to your curtains. With a range of nine stunning colors, this extensive color palette ensures you can find the perfect match for your interior decor. With dimensions of 22mm in width and 32mm in height, the Decorative 1020 cover is compact yet durable. Installing it is a breeze, thanks to its user-friendly design.

What are the benefits of RTS technology?

- RTS transmissions pass through walls. You do not necessarily have to be near your awning or other type of application in which a Somfy motor is incorporated: operating is also from another room or from another floor.
- RTS has a handy and self-adjustable “my” function with which you can easily give a product a fixed, favorite intermediate position. You can change it at any time.
- No additional wires are required for operation. The receiver is in the motor. The only wire required is from the RTS motor to the power supply.
- You can combine controls and controls as desired and expand the system at any time with additional remote controls, wireless wall controls and app control.
- With RTS you can also apply compatible sensors that respond to weather change. For example, a Somfy RTS sun sensor lowers your sun protection during sunlight measurement and the wind sensor collects the sun protection in time if it starts to blow too hard.
- Safe operation with a rolling code reduces interference with other radio products.

Single channel operation

Operate 1 electric roller blind (or other application) individually or a group of roller blinds simultaneously.

Multi channel operation

Operate 1 to 5 electric roller blinds (or other applications) individually or as a group. Expandable up to 16 channels with individual control.
